TUESDAY, SEPTEMBER 16, 1969

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

RECESS

The SPEAKER. The Chair declares a recess subject to the call of the Chair.

Accordingly, at 12 o'clock and 9 minutes p.m. the House stood in recess subject to the call of the Chair.

JOINT MEETING OF THE TWO HOUSES OF CONGRESS TO RECEIVE THE APOLLO 11 ASTRONAUTS

The SPEAKER of the House presided.

At 12 o'clock and 19 minutes p.m., the Doorkeeper (William M. Miller) announced the Vice President and Members of the U.S. Senate who entered the Hall of the House of Representatives, the Vice President taking the chair at the right of the Speaker, and the Members of the Senate the seats reserved for them.

The SPEAKER. The Chair appoints as members of the committee on the part of the House to escort our distinguished visitors into the Chamber the gentleman from Oklahoma, Mr. ALBERT; the gentleman from Louisiana, Mr. BOECE; the gentleman from Louisiana, Mr. HÉSSARD; the gentleman from California, Mr. MILLER; the gentleman from New Jersey, Mr. ROSEN; the gentleman from Michigan, Mr. GERALD R. FORN; the gentleman from Illinois, Mr. ARENDS; the gentleman from Pennsylvania, Mr. FULT; and the gentleman from Ohio, Mr. MCCULLOCH.

The VICE PRESIDENT. On behalf of the Senate the Vice President appoints the following Senators to escort our distinguished astronauts into the Chamber:

- Senator RICHARD RUSSELL, of Georgia;
- Senator MIKE MANSFIELD, of Montana;
- Senator CLINTON ANDERSON, of New Mexico;
- Senator EDWARD M. KENNEDY, of Massachusetts;
- Senator ROBERT C. BYRD, of West Virginia;
- Senator HUGH SCOTT, of Pennsylvania;
- Senator MARGARET CHASE SMITH, of Maine;
- Senator MILTON R. YOUNG, of North Dakota;
- Senator GORDON ALLOTT, of Colorado.

The Doorkeeper announced the ambassadors, ministers, and charges d'affaires of foreign governments.

The Doorkeeper announced the ambassadors, ministers, and chargés d'affaires of foreign governments entered the Hall of the House of Representatives and took the seats reserved for them.

The Doorkeeper announced the Cabinet of the President of the United States.

The members of the Cabinet of the President of the United States entered the Hall of the House of Representatives and took the seats reserved for them in front of the Speaker's rostrum.

At 12 o'clock and 34 minutes p.m., the Doorkeeper announced the Apollo 11 astronauts.

[Applause, the Members rising.]

The SPEAKER. My distinguished colleagues of the Congress, we are honoring today three men who represent the best in America and whose coordinated skill, fantastic daring, and visionary drive have made history that constitutes a turning point of paramount importance in the journey of mankind. I have the high honor and official and personal pleasure of presenting to you the crew of Apollo 11, who successfully made the historic journey to the moon, Neil A. Armstrong, Col. Edwin E. Aldrin, Jr., and Lt. Col. Michael Collins.

The Chair recognizes Mr. Armstrong.

Mr. ARMSTRONG. Mr. Speaker, Mr. President, Members of Congress, distinguished guests, we are greatly honored that you have invited us here today. Only now have we completed our journey to land on and explore the moon, and return. It was here in these Halls that our venture essentially began where the Space Act of 1958 was framed, the chartering document of the National Aeronautics and Space Administration. And here in the years that followed the key decisions that permitted the successive steps of Mercury and Gemini and Apollo were permitted.

Your policies and the marvels of modern communication have permitted people around the world to share the excitement of our exploration. And, although you have been informed of the results of the Apollo 11, we are particularly pleased to have this opportunity to complete our work by reporting to you and through you to the American people. My colleagues share the honor of presenting this report. First, it is my pleasure to present Col. Edwin Aldrin.

Colonel ALDRIN. Distinguished ladies and gentlemen, it is with a great sense of pride as an American and with humility as a human being that I say to you today what no men have been privileged to say before: "We walked on the moon." The footprints of the American people belong to more than the crew of Apollo 11. They were put there by hundreds of thousands of people across this country, people in Government, industry, and universities, the teams and crews that preceded us, all who strived throughout the years with Mercury, Gemini, and Apollo. Those footprints belong to the American people and you, their representatives, who accepted and supported the inevitable challenge of the moon. And, since we came in peace for all mankind those footprints belong also to all people of the world.

As the moon shines impartially on all those looking up from our spinning earth so do we hope the benefits of space exploration will be spread equally with a harmonizing influence to all mankind.

Scientific exploration implies investigating the unknown. The result can never be wholly anticipated. Charles Lindbergh said, "Scientific accomplishment is a path, not an end; a path leading to and disappearing in mystery."

Our steps in space have been a symbol of this country's way of life as we open our doors and windows to the world to view our successes and failures and as we share with all nations our discovery.

The Saturn, Columbia, and Eagle, and the extravehicular mobility unit have proved to Neil, Mike, and me that this Nation can produce equipment of the highest quality and dependability. This should give all of us hope and inspiration. The return of some of the difficult problems here on earth. The Apollo lesson is that national goals can be met where there is a strong enough will to do so.

The first step on the moon was a step toward our sister planets and ultimately toward the stars. "A small step for a man" was a statement of fact, "a giant leap for mankind," is a hope for the future.

What this country does with the lessons of Apollo apply to domestic problems, and what we do in further space
Mr. ARMSTRONG. We landed on the Sea of Tranquility, in the cool of the early lunar morning, when the long shadows would add our perception.

The sun was only 10° above the horizon. While the earth turned through nearly a full day during our stay, the sun at Tranquility Base rose barely 11°—a small fraction of the month-long lunar day. There was a peculiar sensation of the slowness of time—the swift rush of events that characterizes all our lives—and the ponderous parade which marks the aging of the universe. Both kinds of time were evident—the first by the routine events of the flight, whose planning and execution were detailed to fractions of a second; the second by the rocks around us, unchanged throughout the history of man—whose 3-billion-year-old secrets made them the treasure we sought.

The plaque on the Eagle which summarized our hopes bears this message:

Here men from the planets earth first set foot upon the moon July 1969 A.D.

We came in peace for all mankind.

Those nineteen hundred and sixty-nine years had constituted the majority of the human race's existence. This we could look back toward the Earth, our space—toward the new Indies—or we could look forward toward the Moon, toward Mars, toward our future in space—toward the new Indies—or we could look back toward the Earth, our home, with its problems spanned over more than a millennium of human occupancy.

We looked both ways. We saw both, and I think that is what our Nation must do.

We can ignore neither the wealth of the Indies nor the realities of the immediate needs of our cities, our citizens, or our citizens. We can turn our space program away from the Earth. We could turn our space program against the Earth. We could take a long rotation not unlike that of a chicken on a barbecue spit. As we turned, the Earth and the moon alternately appeared in our windows. We had our choice.

We could look toward the moon, toward Mars, toward our future in space—toward the new Indies—or we could look back toward the Earth, our home, with its problems spanned over a millennium of human occupancy. We looked both ways. We saw both, and I think that is what our Nation must do.
